The Byron Church

Experiences Endless Benefits of CommunitySafe

The Byron Church chose to use CallCommand's CommunitySafe after several friends and family members recommended the application to Pastor Wesley Barnhill. Since implementing the program over a year ago, the response from the church community has been wonderful.

"I don't know what a church would do with out CommunitySafe. It allows us to get a message out to everyone at one time. If they are not able to get the live call from me, the Pastor, then they are at least overwhelmed that I would leave a message."

Initially, the Byron Church planned to use CommunitySafe to notify members of a death or emergency within the church. Since then, the Byron Church has used CommunitySafe for devotions for lock-ins, church closings and to address church members' or community needs.

"There is no other product that provides the personal touch that CommunitySafe does. The CommunitySafe consultants have always gone out of their way to take care of my every need. No other business I deal with gives the dedication, support and backing like those at CommunitySafe."

After the Byron Church sent out its first message, members of the church were ecstatic. No one could believe the impact and responses generated from sending out one call to everyone. CommunitySafe eliminates confusion and panic that may arise after an emergency because all recipients receive the same message, at the same time.

"Recently, I was out of town and I got a call about a death in the church. All I had to do was pick up the phone, leave a message and send it out to the distribution list. Within minutes, my congregation was informed of the death in the family and support was able to begin immediately."
